DISCOVERED BY A WOMAN.

A Gold Mine that Is One of the Richest in the Black Hills. One day during the latter part of last June William Franklin and his daughter, Mrs. Frank Stone, happened to stroll up a guich in Pennington County, and, stopping to rest, Mrs. Stone idly broke in two a small piece of rock, which in the break, upon examination, showed some particles of gold. A little digging, says a Chamberlain, S. D., corespondent of the St. Paul Pioneer

ress, exposed more of the rock, which, upon being panned, proved very rich. Everybody in the vicinity, having nothing to do, visited the spot, and for pastime were allowed to dig out some of the rock and pan out the gold. As every man in that vicinity was in bad condition financially and without means of raising the money for the proper celebration of the approaching Fourth of July, quite an opening was made and the proceeds were devoted

to that purpose.

From this little incident dates the discovery of gold in the Holy Terror mine, which from day to day causes greater excitement in mining circles. With five stamps the owners recently ounded out \$3,500 in gold in ten hours. Much of the ore runs \$500 to the ton. Persistent prospecting revealed no

other place where the vein came to the surface save this one spot, which has been walked over every day for years Mr. Franklin took in T. C. Blair as partner and a shaft was begun, the ore taken out being treated in the Keystone mill and returned value muc! above the expense of sinking the shaft. When the shaft reached the depth of forty feet, developing a well-defined vein, which steadily improved with width and value as depth was gained. the owners made an arrangement with J J. Fayel and Albert Amsbury by which they agreed to erect a stamp mill on the property in consideration of a half interest in the inine. A five stamp mill with an engine capacity of ten stamps or more was quickly built at a cost of about \$5,000, and put in operation three weeks ago. While the mill was being built men were employed to run drifts north and south from the shaft at a depth of forty feet, while sinking was pushed in the shaft. Most of the ore milled has been taken from these drifts. The vein consists of marvelously rich ore, averaging sixteen inches on one wall, with about two feet of low grade ore filling the remainder of the vein. The richness of this ore streak must be seen to be believed. Nuggets of solid gold from one to two pennyweights to five ounces in weight are found snugly tucked away waiting to be brought to light, while large pieces of quartz are so bound with gold that the parts hang together when broken with a hammer.

The first clean-up was made in the new mill after a run of thirty-six hours. The result was a retort weighing a little over 166 ounces, from thirty tons of ore as taken from the mine. The second run of twenty-four hours gave a retort weighing 179 ounces, and the third run of twenty-six hours gave 203 ounces. These three retorts are worth \$10,000, and were all produced by a five-stamp mill and taken to the Harney Peak Bank at Hill City for shipment inside of one week from the start. The shaft has now reached a depth of sixty feet and shows a larger and richer body of ore than ever. Parties who have recently visited the mine report that it is probably the richest ever discovered in the Black Hills.

The Longest Words. Below are given the nine longest words in the English language at the resent writing: Subconstitutionalist.

Incomprehensibility. Philoprogenitiveness Honorificibilitudinity. Anthropophagenarian. Disproportionableness. Velocipedestrianistical. Transsubstantiationableness. Proantitranssubstantiationist. - The

One hundred years ago coal oil was unknows. It was first made use of as an ointment for rheumatism.
